Brazil opens anti-dumping investigation into heavy plate as current safeguard expires

By Gabriela Brumatti - Wednesday 02 October

The Brazilian government has started an anti-dumping investigation into heavy plate steel from China, South Africa, Ukraine and South Korea, according to a statement released in an official gazette on Wednesday October 2.

The opening of the investigation is a response to the fact that the anti-dumping measure imposed by the country to contain imports of the product from these same destinations expired on Wednesday, five years after its last extension.

The import duty was originally imposed in October 2013.

The measure previously in force represented an anti-dumping tariff of \$211.56 per tonne for material of Chinese origin, \$135.84 per tonne for material from South Korea and \$52.02 per tonne for material from Ukraine. In addition to the countries mentioned, the government's statement published on Wednesday also foresees that the investigation will analyze imports of the material from South Africa, which has also been sanctioned with anti-dumping tariffs in the past.

"The heavy plate measure was the first anti-dumping duty imposed on the steel sector in more than 10 years following a request from Usiminas [Brazil's largest flat-rolled steel producer]," one trader said.

Fastmarkets' weekly price assessment for steel plate import, cfr main ports South America was \$610-620 per tonne on Friday September 27, unchanged from September 20.

Although anti-dumping investigations tend to be lengthy in Brazil, lasting

close one year, importers do not anticipate a window of opportunity to acquire the material between the end of the current measure and the conclusion of the investigation.

"Those who want to order today will only receive it in April, and a lot has already happened by then," a second trader said about the risk of purchasing the material.

The statement published today by Brazil's Ministry of Development, Industry, Trade and Services (MDIC) also suggests that the government could keep the anti-dumping tariffs in force while this investigation continues.

The investigation covers products classified under Mercosur Common Nomenclature (NCM) codes 7208.51.00, 7208.52.00 and 7308.90.10, which describe low-carbon plates in thicknesses greater than 4.75mm and widths of more than 600mm.

According to the statement, there are sufficient elements to justify that the elimination of the anti-dumping tariffs applied to imports of the product "would most likely lead to the continuation or resumption of dumping and damage to the domestic industry."

In 2023, 119,533 tonnes of these NCM codes were imported to Brazil, 74% of this total from Austria, according to Comex Stat, a trade database from MDIC. In 2012, when anti-dumping measures like this were not yet in force, 345,822 tonnes were imported, with the main country of origin still being Austria, but accounting for only 32% of the total and followed directly by China (27% of the total) and Ukraine (18% of the total).

This year, 58,215 tonnes of the material were imported by the end of August, but China leads with 43,940 tonnes, or 75% of the total.

So far in 2024, Brazil has opened anti-dumping investigations into eight steel product groups, all related to or focused on China-origin imports including non-grain-oriented (NGO) electrical steel, tinplate, steel tubes, cold-rolled steel coil, plate, hot-dipped galvanized steel, Galvalume and, less than two weeks prior, pre-painted.

US domestic plate prices drop amid poor demand, downward spot price trajectory

By Melissa VanDervort - Wednesday 02 October

Domestic plate prices in the US resumed their slide on Tuesday October 1, with sources reporting a soft plate market limping into the fourth quarter of 2024 hampered by persistently weak demand.

Fastmarkets' weekly assessment for steel cut-to-length plate carbon grade, fob mill US fell to \$44 per hundredweight (\$880 per short ton) on October 1, down by 2.22% from \$45 per cwt on September 24.

Inputs were collected in a range from \$42.00-46.50 per cwt, representing deals and assessments of general market activity.

Tepid plate demand continues to weigh on the domestic market, with sources reporting that while mills attempt to hold firm on published prices, transaction prices in the spot market are expected to continue falling for the remainder of the year.

"Yes, poor demand is weighing on prices, [and] plate mills are trying to dig in around that \$45 [per cwt] delivered price range," a service center distributor said. "We'll see if they can limp through Q4 [of 2024] or if anyone cracks or makes year-end 'hush' deals."

All plate sources said that the market is quiet and will remain so for the rest of 2024.

"It's very quiet across the board on quotes on both plate and coil," a second distributor said.

Sources say they expect this downward trajectory to continue into the fourth quarter of 2024, with most anticipating that weak demand and minimal spot trading will continue for the rest of the year, before any possible rebound early in 2025.

"It seems like everyone is holding on for 2025, [and] not much [more] expected for 2024 — not much change, not much upward demand," a plate buyer said. "I'm now making purchases on deals from people who have been holding onto inventory."

Lead times remain at three to four weeks.
