Notably, by 2026, flat steel production is targeted to reach 1.6 million tonnes per year at the plant in Sestao, where ArcelorMittal runs two EAFs. After ramp-up is completed, much of Sestao's portfolio will be XCarb-brand low-carbon-emission steel.

According to market sources, HRC from Sestao has a carbon footprint of 580 kg of CO2 per 1 tonne of steel under Scope 1, 2 and upstream Scope 3.

Fastmarkets' latest weekly assessment of the **green steel domestic, flat-rolled, differential to HRC index, exw Northern Europe** was €100-200 per tonne on January 30, stable since December 12.

Fastmarkets' methodology defines European green steel as "steel produced with Scope 1, 2 & 3 emissions at a maximum of 0.8 tonne of CO2 per tonne of steel."

Julia Bolotova in Brussels contributed to this report.

Thursday, which provided additional support to rebar prices.

The spot market stock of rebar stood at 4.85 million tonnes on Thursday, up by 171,600 tonnes from 4.68 million tonnes a week earlier. But the figure was lower than the 5.78 million tonnes recorded in the corresponding period in 2024.

The downward pressure on rebar prices from market inventories was also lighter than market participants had anticipated, which helped provide rebar prices with some upward momentum, according to an industry analyst.

Market Chatter

"End-user demand for rebar from the housing construction sector remained weak over the past two days, while demand from the infrastructure sector was more active. However, total demand was still at a low level, making it difficult for rebar prices to maintain an upward trend," a trader based in Shanghai said.

Billet

Fastmarkets' daily price assessment for **steel billet domestic, exw Tangshan, Northern China** was 3,070 yuan per tonne including value-added tax on Thursday, down by 20 yuan per tonne from 3,090 yuan per tonne on Wednesday.

Shanghai Futures Exchange

The most-traded May rebar futures contract on the Shanghai Futures Exchange closed at 3,357 yuan per tonne on Thursday, down by 37 yuan per tonne from the closing price of 3,320 yuan per tonne on Wednesday.

Another Eastern distributor confirmed that opinion.

“Companies are concerned about the tariffs and are buying forward now,” they said. “There is concern the president didn’t get much [concession from Canada and Mexico] this time, and will really push [for more] at 30 days in March.”

A producer source said the recent HSS increases are allowing mills to regain some of the desired margin between hot-rolled coil prices and HSS after late 2024 margin erosion.

“We’re trying to recapture some money and cents for our conversion cost

that tanked in the last few months,” the producer said.

HRC in the US has been climbing in price the past two weeks and eclipsed the \$33-36 per cwt (\$660-720 per ton) level it had been stuck in since early August 2024.

Fastmarkets’ daily **steel hot-rolled coil index, fob mill US Midwest** was calculated at \$36.58 per cwt (\$731.60 per ton) on Thursday, up by 1.78% from \$35.94 per cwt a week earlier, on January 30.

Fastmarkets’ weekly **steel hot-rolled coil index, fob mill US South** was calculated at \$37.92 per cwt (\$758.40 per ton) on Wednesday February 5, its highest level since May 2024.
