neutrality roadmaps, accounting for 45% of global capacity. Most of them aim to achieve carbon neutrality in 2050 after cutting emissions by 30% in 2030.

The global steel trading landscape is also set to be reshaped following the emergence of other variants of CBAMs in other regions in the longer term. The market for steel products of reduced carbon emissions has already geared up, after mills such as Baowu, HBIS, SSAB, Salzgitter, H2 Green Steel, ArcelorMittal, POSCO.

The world's largest steel producer China is also mulling including its steel sector into the carbon trading market, which indicates low costs for carbon emissions across Chinese steelmakers in the short term, but they are set to increase in the longer term after China's carbon prices catch up with those in Europe.

5) Supportive policies, green power set to boost Chinese green ferroalloys development in 2025

A suite of supportive policies, including quantitative methods of ferroalloy carbon footprint, futures exchange's financial support to green ferroalloys, the compulsory usage of green electricity in leading ferro-alloy product hub, will drive China's green ferroalloy industry in 2025, market sources said.

The transformation of energy consumption and proliferation green energy in production will directly affect the development of the steel and upstream ferro-alloy industry in China in 2025, according to sources.

According to the latest data from the National Bureau of Statistics, in 2023, the installed capacity of green power supply was 259 million kilowatts, up by 31.4% from 178 million kilowatts in 2022, of which solar and wind power installed capacity grew most rapidly, accounting for 59% and 18% respectively.

In 2024, the Inner Mongolia Autonomous Region, a key ferro-alloy production hub, requires that all the polluted and extensively energy-consuming production capacity of ferro-alloys in the region to shut down to enhance industrial structure optimization and adjustment, sources added.

"Green power is taking a more prominent role in energy supply, overshadowing high energy-consuming facilities, so the development of green ferro-alloys will continue to be supported," a China-based ferro-alloy trader said.

Steel plate news

US plate price unchanged amid market inactivity

By Alesha Alkaff - Tuesday 07 January

The US plate market was stable amid insignificant trading on the spot market, sources told Fastmarkets on Tuesday January 7.

Fastmarkets' weekly assessment for steel cut-to-length plate carbon grade, fob mill US was \$42 per hundredweight (\$840 per short ton) on Tuesday January 7, flat week on week.

The assessment was last higher on December 10 at \$43 per cwt.

Inputs were collected in a range of \$42-44 per cwt, representing deals and assessments of the general market.

After a lackluster December, some sources are optimistic that the plate market will firm in the first quarter of the new year, with market participants keeping tabs on the inauguration of President-elect Donald Trump in late January.

Lead times remain at two to three weeks, sources said.

Rebar news

UAE rebar, billet prices decrease; buying restarts after New Year's holiday

By Serife Durmus - Tuesday 07 January

The prices for steel billet and rebar in the United Arab Emirates decreased during the week ended Tuesday January 7, and buying resumed following the traditionally slow year-end activity, sources told Fastmarkets.

The rebar buyers in the UAE were expecting to hear higher deal prices, but, the final sales were made at lower prices than their assessments.

Meanwhile, Emsteel is offering rebar at 2,652 dirhams (\$722) per tonne ex-works for orders to be produced in January, rising from the previous 2,602 dirhams per tonne ex-works for December production.

The reason for the overall decreasing price, despite the increase in official

local rebar prices, was that the mills gave higher discounts than expected.

Domestic rebar

Emsteel sold rebar at 2,410 dirhams per tonne ex-works during the past seven days.

Re-rollers in the country sold rebar at 2,290-2,310 dirhams per tonne ex-works.

Fastmarkets' weekly price assessment for steel reinforcing bar (rebar) domestic, exw UAE was 2,290-2,410 dirhams per tonne on January 7, falling from 2,300-2,480 dirhams per tonne on December 31.

Billet imports

Iran-origin billet was booked at \$468 per tonne CFR UAE for 25,000 tonnes.

Market participants assessed that the workable price for Oman-origin billet would be at \$510-515 per tonne CFR.

Fastmarkets' weekly price assessment for steel billet import, cfr Jebel Ali, UAE
