Flat steel import prices increase slightly in South America while market remains sluggish

By Gabriela Brumatti - Friday 05 July

Although the flat steel market in South America still shows signs of sluggishness and weakness, import prices in the region increased slightly in the week to Friday July 5.

Fastmarkets' weekly price assessment for **steel hot-rolled coil import, cfr main ports South America** was \$585-620 per tonne on July 5, up by 0.42% from \$590-610 per tonne on June 28.

HRC offers to Brazil were heard in the range of \$580-600 per tonne CFR in the week. Meanwhile, the same product was offered on the South American Pacific Coast between \$625-640 per tonne CFR.

A trader source indicated the HRC import price level to Colombia was \$620-630 per tonne CFR, while a second one estimated the market at \$640 per tonne CFR to the country.

"The market is correcting upward this week with the higher freight and exchange rates, but the mostly CFR price for flat steel imports remained stable with the lower offers from China," a trader source said.

Fastmarkets' weekly price assessment of **steel plate import, cfr main ports South America** was \$635-655 per tonne on Friday, unchanged from June 28.

And Fastmarkets' weekly price assessment for **steel cold-rolled coil import, cfr main ports South America** was \$640-660 per tonne on Friday, also unchanged in the same comparison.

While rolled steel prices remained practically unchanged or only widened their range during the week, coated steel prices narrowed their ranges, reflecting the relatively scarce supply of these types of products in the region. In Brazil, specifically, the import quotas of these materials have been practically exhausted for orders made via import license.

"The market is trying to absorb the increase in tariff to 25% due to the consumption of the coated steel quotas, and is therefore already pricing it," a trader based in Brazil said.

Fastmarkets' weekly assessment for **steel hot-dipped galvanized coil import, cfr main ports South America** was \$730-740 per tonne on July 5, narrowing upward by 2.08% from \$700-740 per tonne on June 28.

And Fastmarkets' price for **steel coil Galvalume import, cfr main ports South**

America was \$790-800 per tonne on Friday, narrowing from \$780-810 per tonne on June 28.

Galvalume® is a registered trademark of BIEC International.

Brazilian slab export prices steady amid cautious buyer sentiment, higher raw material costs

By Ana Enis - Friday 05 July

Brazilian steel slab export prices were unchanged in the week to Friday July 5 amid cautious market sentiment and high raw material costs, sources told Fastmarkets.

Fastmarkets' weekly price assessment for **steel slab export, fob main port Brazil** was \$550-560 per tonne on Friday, unchanged from June 28.

Producers have opted to keep their prices unchanged amid ongoing pressure from raw material costs, while buyers have been reluctant to purchase at current prices and await potential cuts, which has contributed to market stability, Fastmarkets understands.

Some sources reported cautious sentiment because they expect Brazilian slab export prices to dip during July and related markets — such as hot-rolled coil in the US — to seek a price bottom.

Fastmarkets calculated its daily **steel hot-rolled coil index, fob mill US Midwest** at \$31.67 per hundredweight (\$633.40 per tonne) on Friday, down by 2.73% from \$32.56 per cwt on Wednesday July 3.

"I don't believe US HRC prices have bottomed out yet. There might still be room for further declines," one buy-side source said. "Current slab prices are in the range of \$550-560 [per tonne], but buyer interest remains subdued as buyers await fresh pricing offers for the upcoming month. I expect producers to adopt a cautious stance over the next one to two weeks to assess market conditions for September shipments."

Market participants reported that slab demand was stronger for September than for August, but export supply may decrease due to robust domestic demand in Brazil.

"Prices are holding steady but, looking ahead, if the downward trend in HRC prices [in the US] persists, we might see a reduction in [Brazilian] slab prices next week. There's been considerable pressure to lower prices recently, particularly with the ongoing adjustments in the US market," a second source said.

Rebar news

Polish rebar, wire rod prices stable; North African exporters aim Polish, Baltic countries markets

By Julia Bolotova, Darina Kahramanova - Friday 05 July

The prices for Polish rebar and wire rod remained largely stable in the week to Friday July 5 amid low demand, sources told Fastmarkets.

Trading activity is usually limited during the European summer, but local mills kept their offers for long steel products unchanged because of high production costs, Fastmarkets understands.

Rebar

Polish mills offered rebar in the range of 2,750-2,800 zloty (\$692-705) per tonne CPT, the same price level recorded in the previous week.

Market participants estimated the tradeable market levels in the range of 2,730-2,750 zloty per tonne CPT.

According to buyers, lower prices at 2,710-2,720 zloty per tonne CPT can be achieved for volumes exceeding 1,000 tonnes. These levels, however, were not included in the final assessment because they did not comply with Fastmarkets' methodology.

As a result, Fastmarkets' weekly price assessment for steel reinforcing bar (rebar), domestic, cpt Poland was 2,730-2,750 zloty per tonne on Friday, unchanged from the previous week.

Some buyer sources reported improved demand for rebar in the first days of July compared to the beginning of June.

Wire rod

Market participants were not optimistic about the Polish low-carbon drawing quality wire rod market.

According to a distributor source, the summer holidays lull could already be

felt in the market because trading remained limited.

"There is no restocking and the demand is even lower than in the previous month," the source told Fastmarkets.

Despite the slow demand, Polish mills kept their offers for low-carbon drawing quality wire rod unchanged at 2,900-3,000 zloty per tonne CPT.

Sources estimated the workable market level at 2,800-2,900 zloty per tonne CPT, however.

Fastmarkets' price assessment for steel wire rod (drawing quality), domestic, delivered Poland was 2,800-2,900 zloty per tonne on Friday, unchanged week on week.

Import offers of mesh-grade wire rod from Ukraine were heard at €600 (\$648) per tonne DAP border.

Increased interest from North African Exporters

The long steel products market in Poland and the Baltic countries has attracted more interest from North African exporters, sources said.

Companies from Egypt and Algeria plan to increase their exports to the region and are taking steps to comply with local markets' requirements, Fastmarkets understands.

For example, Egyptian steel producer Elmarakby obtained a Polish national certificate for rebar with diameters from 8mm to 32mm steel grade B500SP, the company said on Wednesday. This means that Elmarakby's products comply with the Polish standard for rebar PN-H-93220:2018-02, thus increasing the company's opportunities to export to Poland.

A European producer source said that Algerian Qatari Steel Company received similar certificates for rebar from Poland and some Baltic nations last year.

The producer source added that Algeria would probably try to raise its exports to Baltic countries, and their material could also reach neighboring Poland.

Imports from these countries, however, will be limited by the new safeguard measures imposed by the European Commission. According to the new adjustments, a 15% cap for wire rod is to be applied per country over the tariff rate quota volume initially available in each quarter.
