steel reduced carbon emissions differential, exw China, which calculates the premium for flat-rolled reduced carbon emissions steel over products produced from the traditional blast furnace-based route and came in at 0-800 yuan per tonne on January 17.

Market chatter

“Trump’s additional 25% tariffs on steel imports looks set to have little impact on China’s direct steel exports to the US due to the limited volumes. But it increased market concerns over trade tensions and weighed on sentiment across the steel market,” an industry analyst in eastern China said.

Shanghai Futures Exchange

The most-traded SHFE May HRC futures contract closed at 3,387 yuan per tonne on Tuesday, down by 49 yuan per tonne from Monday’s close of 3,436 yuan per tonne.

Hot-rolled coil news

US Midwest HRC index rises above \$770/ton

By Alesha Alkaff - Tuesday 11 February

Hot-rolled coil prices in the US Midwest rose on Tuesday February 11, with market participants waiting on the sidelines amid continued market uncertainty.

Fastmarkets’ daily steel hot-rolled coil index, fob mill US Midwest was calculated at \$38.58 per hundredweight (\$771.60 per short ton) on February 11, up by 1.63% from \$37.96 per cwt on Monday February 10 and by 7.68% from \$35.83 per cwt on February 4.

Inputs were collected in the range of \$36.25-40.00 per cwt in the buyer sub-index, representing offers and assessments.

Inputs were rolled over in the seller sub-index due to lack of liquidity and to minimize day-to-day volatility.

Heard in the market

Hot band market participants are in “wait-and-see” mode, against the backdrop of President Donald Trump’s decision to impose a 25% blanket tariff on steel and aluminium imports, potentially disrupting supply chains, sources said.

While it’s still too soon to ascertain the true impact of Trump’s tariffs, some sources anticipate domestic HRC prices will strengthen, especially with mills holding firm on elevated offers.

Lead times are reportedly around four to six weeks.

Quote of the day

“The US steel market will eventually firm up and prices will rise but it is too early to know how much and when. We need more clarification about the proposed duties,” a distributor said.

Steel plate news

US domestic plate prices on the rise amid improved demand, recent mill price hikes

By Melissa VanDervort - Tuesday 11 February

Domestic plate prices in the US increased for the third week in a row on Tuesday February 11, with sources saying demand in the plate market is increasing steadily, with the expectation that the trend will continue in the near term.

Fastmarkets' weekly assessment for steel cut-to-length plate carbon grade, fob mill US was \$45 per hundredweight (\$900 per short ton) on Tuesday February 11, up by 2.27% from \$44 per cwt on February 4.

Inputs were collected in a range of \$43-47 per cwt, representing offers and assessments of the general market.

Domestic plate prices are on the rise this week, but it's a slow and steady

upward price trajectory, sources said.

"It's hard to stomach [the increased plate prices], but prices are on the up and up [right now in the market]," a distributor said.

"Quoting and orders have increased [this past week], more customers are calling and [market] activity is solid," a buyer said. "We [in the plate market] certainly hope this continues."

Many sources remain on the sidelines and not active in the spot market as they wait and see where the price needle moves in a rapidly changing steel market, sources said.

"We haven't bought anything [since before the plate price increase from last week]," a second distributor said. "We expect [plate prices] to push higher [in the near term]."

Most plate buyers are purchasing limited tons on contract pricing for the near term, sources said, amid high uncertainty with the sweeping market shake-ups happening since President Donald Trump was sworn into office on January 20.

Lead times remain at two to three weeks.
