Cold-rolled coil news

Bearish sentiment in China’s ferro-chrome market intensifies; Taiyuan Steel’s tender price cut

By Tina Tong - Tuesday 19 November

Ferro-chrome and chrome ore market participants in China became more bearish after Taiyuan Iron and Steel Co (TISCO) announced a 300 yuan (\$41) per tonne cut to its ferro-chrome tender price on Friday November 15, sources told Fastmarkets.

TISCO announced a 7,645 yuan per tonne tender price for its November-delivery, high carbon ferro-chrome, with the move following its 150 yuan cut announced in October.

“The stainless mills are running into difficulties, so they have to reduce production cost via a lower purchase price of raw materials, like ferro-chrome,” a ferro-chrome trader said.

Fastmarkets’ weekly price assessment for stainless steel cold-rolled coil 2 mm grade 304 domestic, ex-whs China was 13,350-13,400 yuan per tonne on November 13, compared with 13,700-13,800 yuan per tonne a month ago.

The lower tender price put downward pressure on those for spot market of ferro-chrome, sources said.

“Smelters on Monday November 18 started to adjust their offers on spot market, accordingly, with spot prices seeing at least a 150-200 yuan per tonne drop,” the ferro-chrome trader said.

Market sources added that the drop in tender price sent ferro-chrome smelters into a further loss.

“Most smelters are already in the red, and now the losses are worsening. We will see increasing production cutbacks in ferro-chrome producers,” a smelter source said.

The weakness also spread to chrome ore market, with buyers expecting price adjustments from miners to match the falling alloy market, according to sources.

“We haven’t heard new offers from miners, but inevitably, the lower tender will hamper chrome ore prices,” a chrome ore buyer said.

Steel plate news

Soft demand, light trading persist in US domestic plate market; uptick expected in Q1 2025: sources

By Melissa VanDervort - Tuesday 19 November

Plate market participants said demand remains soft, with light spot trading lingering two weeks after the US presidential election on November 5, but sources expect a significant uptick in demand in the first and second quarters of 2025.

Fastmarkets' weekly assessment for **steel cut-to-length plate carbon grade, fob mill US** was \$42 per hundredweight (\$840 per short ton) on Tuesday November 19, down 2.33% from \$43 per cwt on November 12.

Inputs were collected in a range from \$38.00-48.75 per cwt, representing spot market offers on the low end, deals mid-range and published mill prices at the high end of the range.

Although the US presidential election is now over, market uncertainty lingers — due in part to the widespread economic and social uncertainty that gripped the US in the second half of 2024.

Most market participants said that President-elect Donald Trump's impending second term would be positive for the plate market, as well as many other sectors of the steel industry, which is still feeling the impact of widespread market uncertainty during the better part of the second half of

2024.

Sources said the market remains soft in the fourth quarter, but with a significant uptick in demand expected late in the first quarter of 2025.

"Plate is soft—too soft," a distributor said.

A second distributor said that although domestic mills are publishing higher prices, they are willing to make cut-deals and discounts on spot trading, making most spot transaction prices markedly lower than published mill prices.

"The plate mills are publishing high prices, but if you go to them with a purchase order for large tonnages, they are ready to sell domestic plate as low as \$40 [per cwt]," the second distributor said.

"[Plate] demand is still sluggish, but quotes seem to have more substance [now], so we'll see where that goes [in the near future]," a third distributor said. "Plate mills are claiming that once the calendar turns [to the first quarter of 2025], they will dig in on price and quote up on projects — but I guess time will tell."

The third distributor added, "Otherwise [the plate market is] pretty much the same, and [it is] entering into the slow season with the holidays coming up, so we'll see."

Market participants expect domestic uncertainty to gradually improve, along with an expected economic boost once Trump is sworn into office in January 2025.

Lead times were reported at three to four weeks.

Rebar news

Turkey secures fresh US scrap cargo, driving export prices to 15-month low

By Geoff Mattson - Tuesday 19 November

A Turkish mill purchased a US deep-sea ferrous scrap cargo at a discount compared with the previous transaction, bringing US East Coast export prices to a 15-month low amid ongoing bearish sentiment in the export market.

An East Coast exporter sold a cargo to a mill in southeast Turkey consisting of an unspecified quantity of an 80:20 mix of No1 and No2 heavy melting scrap at \$353 per tonne CFR, and shredded material at \$373 per tonne CFR on Tuesday November 19, sources confirmed to Fastmarkets.

The cargo price represents a \$9 per tonne discount compared with the **last-reported US sale to Turkey** at \$362 per tonne CFR for HMS 1&2 (80:20), shipped from a separate East Coast exporter to a mill in northwest Turkey on November 11. This is now the lowest-priced US East Coast cargo sold since a **30,000-tonne cargo on July 26, 2023**, which consisted of 12,000 tonnes of an 80:20 mix of No1 and No2 heavy melting scrap priced at \$352 per tonne CFR, along with 18,000 tonnes of shredded and bonus-grade material priced at \$372 per tonne CFR sold to a Marmara mill.

Turkish steelmakers have been largely absent from the deep-sea steel scrap market due to weak finished steel sales and falling rebar prices. The previous significant transaction occurred on November 15, involving two Baltic Sea cargoes. Since then, **mills have shown limited interest in scrap**. Rebar export offers, initially held at \$600-610 per tonne FOB, were reduced to \$580-590 per tonne due to weak demand. Mills are now discussing \$575 per tonne, but this has not generated buyer interest because competitors are offering lower prices.

On November 19, **seaborne iron ore prices rose due to improved market**

rebar prices, a trader in Shanghai said.

The most-traded January rebar futures contract on the Shanghai Futures Exchange (SHFE) posted a second consecutive day of increase on Tuesday and closed at 3,322 yuan per tonne, 90 yuan per tonne from the closing price of 3,232 yuan per tonne on Friday November 15.

Market Chatter

“Market participants in the futures sector were optimistic about the rebar futures contract prices following the National Development and Reform Committee’s announcement at a morning press conference. They anticipate that the economic performance for November and December will maintain the upward trajectory observed since October. This positive outlook has contributed to an increase in the prices of January rebar futures contract,” an industry analyst said.

Billet

Fastmarkets’ daily price assessment for **steel billet domestic, exw Tangshan, Northern China** was 3,060 yuan per tonne including value-added tax on Tuesday, down by 10 yuan per tonne from 3,050 yuan per tonne on Monday.

Shanghai Futures Exchange

The most-traded January rebar futures contract on the Shanghai Futures Exchange closed at 3,322 yuan per tonne on Tuesday, up by 43 yuan per tonne from the closing price of 3,279 yuan per tonne on Monday.
