The most-traded SHFE October HRC futures contract closed at 3,217 yuan per tonne on Tuesday, up by 41 yuan per tonne from the closing price of 3,176 yuan per tonne on [Monday](#).

Cold-rolled coil news

Brazil opens anti-dumping probe on 16 Chinese cold rolled flat steel products

By Gabriela Brumatti - Tuesday 20 August

The Brazilian government has opened an anti-dumping investigation into Chinese flat-rolled steel coils and plate products, according to a statement released in an official gazette on Monday August 19.

A preliminary analysis by the Brazilian Ministry of Development, Industry, Trade and Services (MDIC) indicated that there was undercutting of prices of Chinese imports in all periods of analysis "with evidence of dumping concerning the similar product in Brazil", according to the document.

"For initial purposes, it can be concluded that there is evidence of damage to the domestic industry," the Brazilian ministry said in the publication.

The investigation was initiated after a request filed by domestic producer Usiminas, which was also supported by steelmakers ArcelorMittal and Companhia Siderúrgica Nacional (CSN), MDIC said in the statement.

Fastmarkets' weekly price assessment for [steel cold-rolled coil import, cfr main ports South America](#) was \$590-620 per tonne on Friday August 16, down by 2.42% from \$610-630 per tonne on August 9.

The 16 products affected by the probe were classified under the Mercosur Common Nomenclatures (NCM) codes 7209.15.00, 7209.16.00, 7209.17.00, 7209.18.00, 7209.25.00, 7209.26.00, 7209.27.00, 7209.28.00, 7209.90.00, 7211.23.00, 7211.29.10, 7211.29.20, 7225.19.00, 7225.50.90, 7226.19.00 e 7226.92.00.

Brazil imported 487,716 tonnes of these products in 2023, up by 32.67% from 367,624 tonnes in 2022, according to figures from the MDIC. 275,823 tonnes of these products were imported in the first seven months of the year, up by 27.51% from 216,318 tonnes during the same period in 2023.

386,419 tonnes of these materials imported in 2023 were of Chinese-origin,

accounting for 79.23% of the total imports. It is followed by South Korea with 59,596 tonnes and Vietnam with 15,707 tonnes.

Two of the codes investigated (7209.16.00 and 7209.17.00) were already part of the 11 NCM codes included in the Brazilian quota-tariff mechanism that came into force on [June 1](#) and established limits and a higher tariff for some steel imported products.

The products covered by the quotas include cold-rolled coils with a thickness of between 0.5-1 mm. Meanwhile, the other NCMs that are now under the probe include thicknesses of less than 0.5 mm, more than 1 mm, with different carbon contents, or even including other steel alloys.

"Since the beginning of the quota system, I had clients who were importing cold-rolled products with a thickness below that of the ones submitted to the quotas and now there may be a tariff for them as well," Brazil-based trader said.

"The start of anti-dumping investigation processes was already expected, they will try to tax other products," a second trader said.

The local industry had been urging the government to impose a duty barrier that could contain "predatory and subsidized" pricing practices from steel imports, particularly those from China, sources told Fastmarkets.

Despite industry representatives considering it too early to evaluate the effectiveness of the quota-tariff system, many are already discussing the inclusion of new NCMs in the list of steel products subjected to the mechanism, or even requesting more anti-dumping measures to curb the prices and the domestic industry, sources said.

"Anti-dumping is the cure... I have a diagnosis that in the second half of this year, this should improve for some products, but there should still be pressure from imported material, as Brazil has done everything in the opposite direction of the rest of the world," Companhia Siderúrgica Nacional's executive director and board member Luis Fernando Martinez said during the company's second-quarter earnings call on August 13.

According to the government statement, Chinese producers or exporters responsible for the largest percentage of investigable production will be selected to submit a response to a questionnaire as part of the investigation.

Galvanized and coated steel news

SHFE base metal prices post broad drop; China's key lending benchmarks unchanged

By Laura Li - Tuesday 20 August

All base metal prices on the Shanghai Futures Exchange (SHFE) fell during morning trading on Tuesday August 20, while China's central bank held its key lending rates unchanged, in line with market expectations.

The most-traded SHFE base metals prices, on a per tonne basis, at 10:30am Shanghai time, compared with the 3pm close on Monday August 19.

- Copper (September): 73,780 yuan (\$10,336), down by 0.16%
 - Aluminium (October): 19,595 yuan, down by 0.08%
 - Zinc (October): 23,095 yuan, down by 0.90%
 - Lead (September): 17,475 yuan, down by 1.05%
 - Nickel (September): 129,400 yuan, down by 0.74%
 - Tin (September): 262,600 yuan, down by 0.46%
- (Prices inclusive of 13% value-added tax)

The most-traded lead contract posted the largest move downward on the base metal complex on Tuesday, dropping by 1.05% to trade at 17,475 yuan per tonne.

Deliverable SHFE lead inventories rose by 21,216 tonnes to 60,617 tonnes in the week ended Friday August 16, according to the exchange's weekly stocks report.

"While negative sentiment continues to feature in lead, we believe the sell-off in lead prices will provide an opportunity for those looking to restock ahead of the next battery season," Fastmarkets analyst James Moore said.

Zinc recording the second-biggest drop during morning trading, with the most-traded contract price for the galvanizing metal down by 0.90% to trade at 23,095 yuan per tonne.

Sluggish downstream consumption amid an ongoing summer lull, coupled with the recent overall price pullback in the ferrous metal sector, has affected demand for the galvanized metal, leading to a fall in its price, sources said.

"We are approaching the traditional peak season for downstream consumption in September and October, but people are still cautious about how much demand can improve during this period of time," a Chinese zinc trader said.

Despite the price dip, the continued tight supply of feedstock zinc concentrates, which has led to production cuts by Chinese smelters, still provided support for zinc prices, sources told Fastmarkets.

Fastmarkets' twice-monthly assessment of the zinc spot concentrate TC, cif China was \$(10)-(40) per tonne on Friday August 9, from \$(20)-5 per tonne on July 26.

Meanwhile, China's central bank left its key lending benchmarks unchanged on Tuesday, with the one-year loan prime rate (LPR) at 3.35% and the five-year LPR at 3.85%.

The steady monthly readings were in line with market expectations after the People's Bank of China lowered mortgage reference rates a month earlier.
