Most market participants were of the view that coking coal price movements will have a stronger influence on the production plans of Chinese mills toward the end of 2023.

Robust demand for coke cargoes in the domestic market alongside a tightening of coke production capacity in Shanxi province has kept prices elevated since September, sources said.

Fastmarkets' **hard coking coal domestic China spot market, Shanxi-origin, delivered Tangshan, index averaged 2,390 yuan per tonne** in the trading week between October 16-20, 370 yuan per tonne higher compared with average prices in the trading week ended Friday September 8.

"Strong hot metal production from Chinese steelmakers have resulted in firm demand for coke products in the domestic market," a Beijing-based trader said, "coke producers facing a lower production capacity were motivated to raise prices to keep up with demand."

China's top four coke producing hubs have been **phasing out coke ovens** smaller than 4.3 meters by the end of 2023 to support the country's push for decarbonization of the coke industry.

Small coke oven (smaller than 4.3 meters) output continued to account for 18.5% of the country's total coke capacity by the end of July 2023, most of which are operating from Shanxi and Inner Mongolia.

"Iron ore prices are low enough for Chinese mills to continue existing levels of procurement, and mills can always buy cheaper blends in the market," a trader in Singapore said, "but it is harder for mills to control their costs of coke supplies against price fluctuations because they simply need more coke to maintain existing levels of production,"

A second Singapore-based trader added, "Coke prices and downstream demand are likely to be the key indicators that we will be looking out for in predicting future price trends of the market toward the end of 2023."

Rebar news

Seaborne iron ore prices rebound strongly on positive sentiment

By Shu Yi Zheng - Tuesday 24 October

Seaborne iron ore prices pushed up on Tuesday October 24, in line with rising futures and swaps, with sentiment improving after it emerged that China plans to issue a trillion yuan of additional treasury bonds to spur economic growth, sources told Fastmarkets.

Key drivers

The most-traded January iron ore futures contract on the Dalian Commodity Exchange (DCE) was up on Tuesday compared with Monday's closing price of 835 yuan (\$114) per tonne.

And by 6:29pm Singapore time, the most-traded November swaps contract on the Singapore Exchange (SGX) was up by \$3.28 per tonne from the previous settlement price of \$112.77 per tonne.

A Zhejiang-based trader told Fastmarkets that iron ore prices rebounded because of positive sentiment generated by an upturn in downstream construction steel transactions in China compared with earlier in October,
