### Rebar news

## China ferro-silicon prices dip amid lower steel prices, cautious sentiment

By Jessica Long - Wednesday 29 November

Chinese ferro-silicon prices fell in the week to Wednesday November 29, following those in the downstream steel market and because of cautious sentiment among market participants, sources told Fastmarkets.

Fastmarkets' price assessment for ferro-silicon, 75% Si min, in-whs China was 7,000-7,200 yuan (\$1,000-1,014) per tonne on Wednesday November 29, down by 100 yuan per tonne from 7,100-7,300 yuan per tonne a week earlier.

Fastmarkets' price assessment for ferro-silicon, 75% Si min, export, fob China was \$1,260-1,300 per tonne on Wednesday, down by \$30-50 per tonne from \$1,290-1,350 a week earlier.

Fastmarkets' price assessment for ferro-silicon, 75% Si min, cif Japan — which covers Chinese material shipped to Japan — was \$1,270-1,320 per tonne on Wednesday, down by \$20-50 per tonne from \$1,290-1,370 a week earlier.

Overall downstream steel demand remained subdued, with declining steel prices and fewer steel mill tenders.

Fastmarkets' weekly price assessment for steel reinforcing bar (rebar) domestic, ex-whs Northern China was 3,840-3,880 yuan per tonne on November 24, down by 40-50 yuan per tonne from 3,890-3,920 yuan per tonne a week earlier.

Continually declining steel mill tender prices have negatively affected the confidence of many upstream ferro-silicon market participants, leading them to stay on the sidelines and wait for the guidance of next round of steel mill tenders, sources said.

"Some steel mills yesterday have released their 75% ferro-silicon tenders at 7,000-7,200 yuan per tonne, which was around 40-50 yuan per tonne lower than the previous round steel mill tenders," a ferro-silicon trader source said.

The trader added, "Most market participants conducted hand-to-mouth purchases and have less willingness to pre-stock before the new year amid increasing wait-and-see market sentiment."

Downstream steel demand has not improved, with upstream ferro silicon piling up among some ferro silicon production hubs, multiple sources told Fastmarkets.

In addition, news of lower semi-coke, a key raw material in ferro-silicon

second scrap seller in Mexico told Fastmarkets.

In September, Deacero **announced an investment** of \$1 billion to build a steel

mill with a capacity of 1.2 million tonnes per year over the next three years. This mill facility will be able to produce 700,000 tpy of sections, and 500,000 tpy of wire rod and rebar, according to local media reports.
