"We look forward to having approximately 350 Kloeckner employees join the Russel team," Reid said in the statement.

The estimated cost of the acquisition includes the working capital, real estate, buildings and equipment, along with the operating personnel for the seven locations.

The purchase price is based on the net book value of the working capital of the seven Kloeckner locations, which was approximately \$67.1 million on June 30, 2025, in addition to \$51.5 million for the property, plant and equipment, according to the statement.

The seven service centers generated average annual revenues of approximately \$500 million and average annual adjusted earnings before interest, taxes, depreciation, and amortization (EBITDA) of approximately \$20 million, during the period between January 1, 2023, and June 30, 2025.

Russel Metals, which is one of the largest metals distribution companies in North America, has been on a **steady acquisition spree** in the past few years, focusing on US-based businesses.

Russel Metals purchased Tampa Bay Steel in Florida in 2024 and bought seven service centers in Western Canada and the US Northeast from Samuel, Son & Co in **December 2023**.

It also acquired Wisconsin-based Sanborn Tube Sales in **2020**, US distributor Boyd Metals in **2021**, and Odessa, Texas-based City Pipe & Supply in October **2019**.

Russel Metals also merged its Canadian oil country tubular goods and line pipe business with that of Marubeni-Itochu Tubulars America Inc (MITI) in **July 2021** and began operating it under TriMark Tubulars.

Whitehouse also called for a "national alignment" on climate and energy policies.

"By pulling clean energy off the grid, everyone pays higher energy costs," Whitehouse said.

The Trump administration cancelled \$679 million in federal funding for ports to support the country's offshore wind industry, when the Transportation Department said on August 29 it was terminating or withdrawing federal funding for 12 projects across the country.

These funds were previously approved by Biden's administration, the port projects ranging from California to Virginia.

The Trump administration also ordered on August 22 that work be halted on a nearly complete \$4 billion wind farm project off the coast of Rhode Island, when the Bureau of Ocean Energy Management issued a stop work order for what it said were national security concerns.

However, a federal judge ruled on September 22 to lift the order against the Revolution Wind project in Rhode Island, dealing Trump a setback in his efforts to restrict the wind farm industry.

Domestic steelmakers had pivoted to build capacity to supply steel products to the offshore wind energy sector, including JSW Steel USA and Nucor.

JSW Steel USA invested \$110 million to upgrade its plate mill facility in Baytown, Texas, in 2024, with the money directed to produce monopile steel plates, which are large steel plates that are welded together to create a foundation for offshore wind turbines.

Nucor's new low carbon heavy gauge steel plate product, Elcyon, will be manufactured at its \$1.7 billion plate mill in Brandenburg, Kentucky.

Steel plate producers are not the only ones affected by the current administration's public policies as Trump also cut back on electric vehicle (EV) funding via the "Unleashing American Energy" executive order signed on January 20.

Under the executive order, all funding for EV infrastructure which had been directed during the Biden administration as part of the IRA was immediately paused.

Consequently, federal tax credits for EV sales are set to expire at the end of September this year.

The Trump administration has implemented a 25% tariff on most imported vehicles and some auto parts this year, which has dented the bottom lines of domestic automakers due to entrenched global supply chains.
