Steel plate news

US domestic plate prices decline amid weak demand

By Melissa VanDervort - Tuesday 09 September

Plate prices in the US fell on Tuesday September 9, with market participants reporting that ongoing spotty demand and sluggish spot activity have caused downward price pressure in the domestic market.

Fastmarkets' weekly assessment for **steel cut-to-length plate carbon grade, fob mill US** was \$50 per hundredweight (\$1,000 per short ton) on Tuesday, down by 1.96% from \$51 per cwt on September 2.

Inputs were collected in a range from \$49.50-52.50 per cwt, representing deals heard, offers and assessments of the general spot market.

The domestic plate market remained quiet, sources said, with stagnant demand and scant spot trading contributing to the downward price trajectory.

"Week after week, it's more of the same," a distributor source said. "We keep hearing and hoping things will improve, but demand remains spotty."

Some market participants expect an uptick in demand heading into the fourth quarter of the year, while other sources anticipate that demand and spot activity will not rebound until 2026.

"[The] plate [market] is pretty boring [with] weak demand," a second distributor said. "We expect things to be flat for the rest of 2025. Hopefully, we will see a pickup in 2026."

A buyer shared a similar view, saying, "We continue to see quietness in the steel [plate] market. There are talks of pent-up demand, but trust in government data has become a leap of faith. I expect demand to increase in 2026."

"Demand [is] the same stagnant demand we have been seeing. I can only hope that the start of the fourth quarter brings some better demand — I guess we'll find out soon enough," a third distributor said.

A fourth distributor said he was optimistic for the final quarter of the year.

"I do feel [that] we'll see increased business going to the end of the year. It has been busier last [week] and this week, but that's not enough time to set a trend," the fourth distributor said.

Lead times were reported at four to six weeks, according to sources.
