Fastmarkets' weekly price assessment for **steel hot-dipped galvanized coil, domestic, ex-whs Eastern China**, which considers 80gsm zinc-coated zero-spangle HDG, was 4,100-4,150 yuan per tonne on Friday, unchanged from a week earlier.

China targets a 3% growth in 2025; market skeptical toward possible boost in steel demand

By Jessica Zong - Tuesday 16 September

China set a higher target for automobile sales in 2025 compared with a year earlier, with the country aiming to keep the upward momentum in 2026, according to a notice published by the Ministry of Industry and Information Technology (MIIT) on Friday September 12.

The 2025 sales target now stands at 32.3 million units, up by 3% from 2024. Of which, the sales of new energy vehicles (NEV) are projected to reach 15.5 million units, up by 20% from in 2024.

Chinese automobile sales totaled 31.44 million units in 2024, with that of NEV at 12.87 million units, according to data published by China Association of Automotive Manufacturers (CAAM).

"The target can be achieved easily because the first eight months have a sharp year-on-year increase," an industry analyst said.

China's automobile production totaled 21.05 million units in the first eight months of 2025, up by 12.7% or 2.37 million units from 18.68 million units

during the same period a year earlier. Sales totaled 21.13 million units in the same period, up by 12.6% or 2.37 million units year on year from 18.76 million units.

Market participants told Fastmarkets that the country's latest targets were in line with expectations, but they were also of the view that it may not lead to stronger steel demand.

"Prices of hot-rolled coil, cold-rolled coil and hot-dipped galvanized coil, which are used in auto making, weren't stimulated to increase by the MITT's notice," a steel trader based in Shanghai said.

Fastmarkets' daily assessment for **steel hot-rolled coil domestic, ex-whs Eastern China** was at 3,410-3,420 yuan (\$479-481) per tonne on Monday September 15, up by 20 yuan per tonne from 3,390-3,400 yuan per tonne on Friday September 12 due to the bullish sentiment caused by expectations of capping steel capacity.

Meanwhile, the high inventories in the spot market and a lack of recovery in demand weighed on the CRC and HDG markets, according to sources.

Fastmarkets' weekly assessment for **steel cold-rolled coil domestic, ex-whs Eastern China** was at 3,800-3,840 yuan per tonne on Friday, down by 10-30 yuan per tonne from 3,830-3,850 yuan per tonne a week earlier on September 5.

Fastmarkets' weekly assessment for **steel hot-dipped galvanized coil domestic, ex-whs Eastern China** was at 4,100-4,150 yuan per tonne on Friday, unchanged from a week earlier.

"The increase in the annual target was even lower than the pace seen during the January-August period, which could lead to bearish expectations toward the demand for HRC, CRC and HDG for the rest of this year," a trader based in Hangzhou said.

Support for electrical steel demand

There are also expectations among market participants that the higher target for NEV sales could support the demand for electrical steel in the long term, sources told Fastmarkets.

China produced 9.63 million units of NEV in the first eight months of 2025, up by 37.3% or 2.62 million units from 7.01 million units during the same period a year earlier. Sales of NEV totaled 9.62 million units in the same period, up by 36.7% or 2.58 million units year on year from 7.04 million units, according to CAAM.

"Brighter prospects of NEV led to a boost in investments into electrical steel production lines. The steel product has found itself in oversupply, with prices declining gradually in the past few months of this year," a second steel trader in Shanghai said.

Fastmarkets' weekly assessment for **electrical steel, non-grain oriented, ex-whs Eastern China** was at \$580-639 per tonne on September 12, compared with \$581-630 per tonne on September 5. The price is down by \$32-64 per tonne from \$644-671 per tonne on January 3.

"The new capacity of NGOES launched in 2025 is estimated to exceed 3 million tonnes. The price competition seems inevitable though demand for the product is on an uptrend," an industry analyst said.

Steel plate news

US domestic plate prices steady in flat market

By Melissa VanDervort - Tuesday 16 September

Fastmarkets' weekly assessment for **steel cut-to-length plate carbon grade, fob mill US** was \$50 per hundredweight (\$1,000 per short ton) on Tuesday, steady from September 9, but down by 1.96% from \$51 per cwt on September 2.

Inputs were collected in a range of \$46-52 per cwt, representing deals heard, offers and general assessments of the spot market.

Demand for domestic plate is mostly dormant, sources told Fastmarkets, with sluggish spot activity widely reported in the market.

"Demand is still flat and we see things heading further south unless demand picks up heading into the new year," a distributor said.

"My current thoughts are [that] the plate market is in shambles," a second distributor said. "Demand seems to slow [down more] by the week [and there are] no issues with supply."

Market participants said that mills are willing to negotiate deals for large-tonnage orders, while spot buyers continue to be cautious and only purchase as necessary to keep inventories low.

"Transaction [plate] prices are falling [and it] seems that mills [are] making bigger discounted deals than expected," the second distributor said.

"Customers are just buying what they need, so inventories remain low across the board," a third distributor said. "It's more of the steady, slow pace. We see orders weekly, but nothing crazy. Scrap [prices] looks to go sideways or down again [in the near term], so we expect more of the same."

Lead times were at four to six weeks, sources said.
