Galvanized and coated steel news**US Galvalume price increases by \$40/t in January as lead times stretch out**

By Rijuta Dey - Tuesday 20 January

The US domestic Galvalume price increased by \$40 per short ton in January as production snags tightened the supply of the coated product, stretching out domestic lead times, sources told Fastmarkets.

Fastmarkets' monthly price assessment for steel coil Galvalume, fob mill US was \$52 per hundredweight (\$1,040 per short ton) on Tuesday January 20, up by 4.00% from \$50 per cwt on December 16, and 18.18% higher than the same month last year, when it was assessed at \$44 per cwt.

Domestic lead times are in early to mid-March, sources said.

Import prices for the coated metal have increased as well, for deliveries in June, sources said.

Fastmarkets' price assessment for steel coil 55% Al-Zn coated steel import, South Korean-made, ddp Gulf Ports was assessed at \$68.50 per cwt on January 20, rising by 2.24% from the previous month's assessment of \$67.00 per cwt.

And Fastmarkets' price assessment for steel coil 55% Al-Zn coated steel import, non-South Korean-made, ddp Gulf Ports was \$67.50 per cwt on January 20, rising by 2.27% from the previous month's assessment of \$66.00 per cwt.

"There are production issues among the domestic steelmakers; we are seeing price pressure even when demand has been soft," a distributor said. "Also, the major paint companies have announced that they will enforce a 6% price increase in paint costs in March, due to rising raw material costs," the distributor said.

"There are virtually no imports coming in now till March, and domestic lead times have gone out," a second distributor noted.

A domestic producer also said that lead times have stretched out.

"Our lead times are into late March right now, and on some lines will flip into April at the end of next week," the producer said.

Additionally, multiple market sources confirmed that there has been no impact on production due to a transformer providing power to Steel Dynamics' Sinton, Texas, mill being knocked out by an electrical substation fire a week earlier.

Galvalume® is a registered trademark of BIEC International.

**Steel plate news****Weekly US raw steel production**

- Tuesday 20 January

Fastmarkets tracks raw steel production by US mills for the week ended January 17, 2026.

**Nucor raises plate prices by \$40 per short ton**

By Melissa VanDervort - Tuesday 20 January

Charlotte, North Carolina-based steelmaker Nucor announced a plate price increase of \$40 per ton (\$2 per hundredweight) in a letter to customers on Friday January 16, Fastmarkets has learned.

This increase is effective with all new orders not confirmed by close of business on January 16, the letter stated.

Additionally, the steelmaker announced that they have opened their order books for March 2026 production.

Nucor previously increased plate prices by \$40 per short ton (\$2 per hundredweight) in a letter to customers on December 22.

Plate prices in the US were steady on Tuesday January 13, with sources reporting a notable uptick in demand and trading activity from late-December levels.

Fastmarkets' latest weekly assessment for steel cut-to-length plate carbon grade, fob mill US was \$52.50 per hundredweight (\$1,050 per short ton) on Tuesday, steady from January 6 after going up by 0.96% from \$52 per cwt on December 30.

**Demand outlook**

A mill source described overall demand as "OK" or "flat" and primarily being driven by expanding demand for wire rod to build AI data centers.

"The rest of the construction market is fairly unimpressive," but is expected to surge in the second quarter, they added. "Prices are going up on higher material costs."

The market, normally subject to downward pressure from imports, is more receptive to higher prices "because incoming import tonnages are down and are expected to be down through January and February and most of March," the mill source said.

"But I do think we'll see an overall surge at the end of the first quarter," they added.

The expected improvement will come from infrastructure bills and private projects that have been delayed a few months, waiting for direction on interest rates, the mill source said.

"For now they are just getting through the cold weather season. We'll start to see benefits of some of those delayed projects in the second quarter," they said.

Alternative rod

Fastmarkets' monthly price assessment for **steel wire rod (high carbon), fob mill US** was \$67.50 per cwt on Tuesday, up by \$1.50 per cwt, or 2.27%, from \$66 per cwt on December 16, 2025.

And Fastmarkets' monthly price assessment for **steel wire rod cold-heading quality, ddp** was \$73 per cwt, up by \$9 per cwt, or 14.06%, from \$64 per cwt on December 16, 2025.

High carbon (HC) and cold-heading quality (CHQ) wire rod continue to maintain a wide spread against low carbon (LC) wire pricing, a process that began in 2023 and resulted in a **tripling of the spread by early 2024**, with the market either maintaining or expanding that spread in the intervening years since.

"The wider spread is here to stay. It's the new normal," the mill source said.

"There's not as much import competition on HC as there is on LC. That's what created the higher premium. It's a little more difficult [for overseas exporters] to navigate HC import, with its different specifications that require HC to be drawn and sold to a specific tensile spec," they said.

Like HC, CHQ has had more qualifying processes for "value-added grades," the mill source said. In turn, this makes it more difficult for overseas exporters to successfully sell to US buyers, limiting imports to the US.

Steel slab news

Brazilian crude steel output falls in 2025 as imports continue to rise, led by rolled products

By Nina Gattis - Tuesday 20 January

Brazil's crude steel production totaled 33.3 million tonnes in 2025, down by 1.6% from the previous year, according to data released by the Brazilian steel industry association Instituto Aço Brasil.

Over the same period, steel imports continued to expand, reaching 6.4

million tonnes. Of this total, 5.7 million tonnes were rolled steel products, marking a sharp increase of 20.5% year on year.

Import volumes were broadly in line with estimates released by the association in December. It is worth noting, nevertheless, that the projected import total for 2025 was revised downward in December from Aço Brasil's previous estimate, representing a reduction of 11.7 percentage points compared with the earlier projection.

Despite weaker domestic sales, apparent steel consumption increased by 2.6% to 26.8 million tonnes in 2025. Domestic shipments edged down by 0.4% to 21.2 million tonnes, while exports rose significantly, totaling 11 million tonnes, up by 14.7% compared with 2024.
